

## Unify your procurement and supply chain processes.

### Clean content. Single point-of-access. Best-in-class adoption.

Even with a spend management solution in place, most companies have less than 20% of spend incorporated into their current solution. Without a strong network, procurement initiatives fall short of delivering to their promised potential. Having few suppliers on board, a lack of content, and low employee usage often leads to uncontrolled maverick spending, inability to meet cost- reduction targets, and no return on a massive technology investment.

Supplier enablement is often the major roadblock to a successful procurement program. That's because manual, costly, and inefficient process to onboard and manage suppliers and their content will stifle any network's growth.

So what makes this Network different? For starters, it's 1,000,000 buyers and suppliers strong and it continues to grow year after year, bringing even greater value to our users.

### Benefits

Over 1,000,000 buyers and suppliers already use our solution for its time- and cost-saving benefits. Joining the Rearden Network can help your organization:

- Eradicate paper processing
- Eradicate payment errors
- Improve efficiency in transacting documents
- Improve contract compliance
- Enhance connectivity
- Maximize adoption
- Reduce spend
- Gain additional visibility into spend
- Lower management cost

Three key components have lead to our success:

#### 1. Our Management:

We cleanse, categorize, and aggregate supplier catalogs, and update them on a regular basis using services and technology that facilitate catalog loading and updates.

#### 2. Our Catalog:

We give you a single repository to access integrated, connect-once web-scale marketplace.

#### 3. Our eDocument Exchange:

Our focus is not just on organization control and policy compliance, but also on ease-of-use. So you get a best-in-class user-experience and high adoption.

# Maximize effectiveness. Drive predictable results.

---

### Supplier Onboarding

- Issue convenient electronic registration invitations to any supplier
- Tailor standard invitations to provide buyer-specific instructions
- Initiate supplier registration and profile completion
- Communicate key activities that need to be completed: training, integration, testing
- Specify required capabilities for standard transactions (e.g., PO, ASN, Invoices)
- Indicate content requirements (e.g., contract, hosted catalog, punch-out, ad-hoc)
- Attach and manage documentation Catalog Management
- Receive, prepare, approve, and load accurate, clean, rich catalog content
- Support guided self-service entry of content via standard templates
- Tailor validation rules and approval workflow to unique requirements
- Provide status visibility and support bi-directional communications

### Content Development Services

- Provide information rich content for Rearden-hosted and 3rd party catalogs
- Eliminate duplicated items and information
- Cleanse and enrich content to support commercial requirements (including validation, normalization, categorization, parameterization, parameterization sourcing, and image sourcing)
- Enable advance search functionality

### Catalog Connector

- Catalog search and Shopping Cart to behind-the- firewall procure-to-pay systems
- Enrich the shopping experience with consumer-like user interface and high-quality catalog content
- Reduce Punch Out confusion by providing a single, integrated view of suppliers' web stores and combine items into a single shopping cart
